SPORT TESTING

Skills Development Testing 2015:
Maine Amateur Hockey
Association

THE IDEA

To provide your athletes with a hockey specific skills report card to start off their season. This is used to identify strengths and weaknesses for fundamental skills without any human bias. Your association & coaches will also have access to report cards to help design their skills development plans for the season!

WHAT IS IT

We provide you the means to test & track athlete development using state-of-the-art equipment designed by Sport Testing™. Using the most accurate technology in the world to evaluate an athlete's performance, our high-precision systems reveal true strengths and weaknesses with results that show any athlete exactly where they stand, giving a blueprint for real improvement.

THE EQUIPMENT

Sport Testing™ is used to run combines for the QMJHL, WHL as

equipment prospect NHL, OHL, well as

many individual NHL & CHL teams. Sport Testing™ is also used across North America with minor hockey associations and teams. Game-like testing drills include skating speed and acceleration, agility, transition skills, read & react skills. All standardized tests include an added progression with puck. The standard hockey combine also includes several off-ice testing drills to further track hockey related skills and fitness. Users have the opportunity to design any additional type of drill on or off the ice.

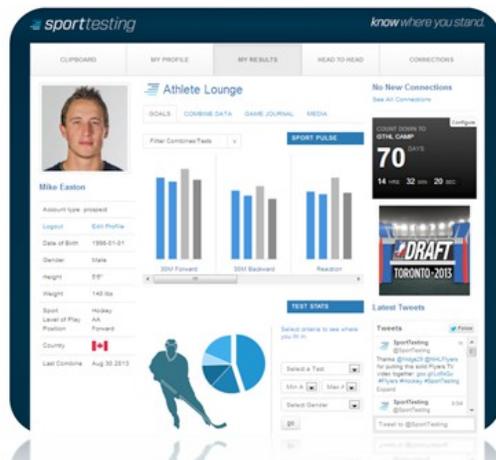

TRACKING RESULTS INSTANTLY

Sport Testing's wireless Sport Gates™ and Sport ID™ hardware sync with the Sport Hub™ interface. After a testing session Sport Hub™ uploads result to your Athlete Manager™ online database. You can create comparative reports, analyze individual data, and much more.

VIEWING RESULTS

Players and coaches are sent detailed result reports in easy-to-manage and personal online accounts; Athlete Lounge™. There you can use comparative data to pinpoint strengths and weaknesses, target training, track improvement, and compete with peers. Results can also be displayed instantly at larger combines using dynamic LED Scoreboards or basic LCD screens.

Players are provided true development map without the worry of either positive or negative human bias and exaggeration. Coaches and instructors are given a valuable tool to continue to best help their players.

WHO WE ARE

RISE Sport Testing is a Certified Testing Partner of Sport Testing™. Sport Testing™ and its Certified Testing Partners collectively provide combine services for prospect combines for the NHL, NLL, NBA, CFL. Hockey specific services also include clubs such as; Montreal Canadiens, Edmonton Oilers, Philadelphia Flyers, Toronto Maple Leafs, Dallas Stars, Los Angeles Kings, Winnipeg Jets, Detroit Red Wings, Hamilton Bulldogs, Toronto Marlies and many more junior & youth programs across the world!

RATES

Special introductory rate provided to Maine Amateur Hockey at **\$48.00** per player for standard on-ice testing, or **\$80.00** per player for two standard on-ice testing.

The hockey market value for Sport Testing across Canada and the USA is \$100-\$150 per player per single session. We're pleased to bring this world class system to your community and provide a special rate for your minor hockey association at only \$48.00 per player!

TESTING DRILLS

Standardized game-like drills are offered to best measure hockey specific skills on-ice.

- Speed
- Quickness
- Agility
- Transition
- Reaction

Results from standardized tests also enter into a global database where players may compare against player averages by age from across the world.

PURPOSE & USE

Although it is an excellent opportunity use a world class system just like the top juniors and pros, the main purpose of testing is for personal development. It is important for players, parents, and coaches to focus on improvement and not where as player ranks with their scores within their specific group, association, or globally. The global database is a powerful tool to see how players stack up against others from around North America and the world, but nevertheless it is just another measuring tool to help identify strengths & weakness that need to be focused on during the season.

RISE Sport Testing is partnering with Minor hockey associations to assist in the long-term development of their athletes. Our system provides the means to continually track the core development skills that are key to in-game success. Following your combine RISE Sport Testing provides the association & coaches with an explanation of the player results with some advice on how to effectively utilize the information moving forward. Associations and coaches who are committed to skill development and long-term player development over their standings or tournament victories at key youth ages will certainly gain the most from our tool!

BASIC LOGISTICS FOR TESTING

- Host sends participant info prior to camp, accounts created, ID #'s assigned
- Players receive Sport Testing™ wristband at check-in that is connected to their specific ID #
- On-ice set-up; at least 45 mins of ice time needed prior to start of actual testing
- When testing multiple groups through the day only 15 minutes needed for reset after floods
- Separate on-ice session & set-up required for testing goalies
- Once combine testing begins; players swipe wristband, timing gates and Sport Hub™ activate automatically and instantly updates once drill is done
- Simultaneous testing drills occur at the same time, players efficiently rotate
- Once reviewed by RISE Sport Testing, data is released instantly to each player's Athlete Lounge™ account
- Athlete Lounge™ accounts are also created for Host coaches/administrators to view & monitor testing results
