

**Report of the Washington State Adult Soccer Association
To Region IV
Friday, February 13, 2015
San Francisco, California**

2015 marks the 85th anniversary of the establishment of the Washington State Soccer Association. Soccer in the Evergreen State can trace its root back to the 1860's when miners from Europe brought the beautiful game to the Pacific Northwest.

Since we met in Southern California in January, we have added the Kirkland Parks Department to our affiliated associations. They will begin men's and Coed 8 v 8 in the summer of 2015. Josh Vega from our staff is assisting with the launch of this league.

The WSASA has added Baden as our soccer ball sponsor. We will be providing high quality, low cost soccer balls to our affiliates at a nominal price. We have also developed a state logo ball as part of the agreement.

My next two comments will echo those shared by Cal South. The WSASA strongly support the the Strategic Plan developed by the USASA Board of Directors. It is very important that as an organization we move forward to fully implement the plan.

Secondly, the Washington State Adult Soccer Association was notified in January 2015 by USSF, that they have received an application from another organization seeking to replace the WSASA as the Adult National State Association in Washington. We will be replying to USSF by the last week in February.
