

## **Georgetown Soccer Association** **Field Usage and Safety Guidelines & Policies**

### **Fields Usage:**

Coaches/Trainers/Parents/Team Managers – the following policies are mandatory during both games and practices.

- 1) No shin guards - no practice!
- 2) No practicing in the goal box – Coerver goals should be placed on top the of the goal box.
- 3) Coverer goals must be put back against the light polls at the end of each session unless the coach of the next session is ok with you leaving them out and he/she will put them up. If you are the last team you have to put them back.
- 4) No repetitive activities - like ladder practice on playing areas of the field.
- 5) For practice days use only red flags. The white ones with the crest on them as those are for games only.
- 6) Parents are welcome to walk or jog around the outside of the playing area of the complex.
- 7) Do not leave your trash/water bottles. Put them in the trash cans.
- 8) Sand bags should stay on the goals.

### **Parent Seating During Team Practices:**

Parents and families are not permitted to be in the team practice areas. Only players and coaches should be on the practice areas beyond the yellow ropes or more than 10 feet from the fence line. This is for the safety of both the players practicing soccer and the parents and families not playing. If you are a coach of a rec team and have a child playing on another team, we ask that you also abide by this policy when not coaching your team. Please sit and observe practices from the designated areas by the west walk-in-gate (by the dumpster) or by the pavilion/concession stand. The parent viewing areas are marked by ropes. The parent viewing areas are also posted on Page 9 of the practice field schedule on our website, under the Schedules tab.

If you would like to walk or run around the complex during your player's practice, you may do this along the fence and tree line. Please keep non-practicing children brought to practices under your supervision at all times and do not allow them to bring rocks from the driveway area into the grass sitting area as this is dangerous to our field maintenance crew and equipment. Please do not let your children play on any of the equipment or goals.

### **Additional Facility Rules**

Please observe these additional field and facility rules. Thanks for your cooperation.

- 1) Pets are prohibited at GSA Ray Thomas fields
- 2) Observe No Parking Signs. Violators will be towed if notification with vehicle owner cannot be made.

## **Georgetown Soccer Association** **Field Usage and Safety Guidelines & Policies**

- 3) No parking along the entry corridor to the GSA Ray Thomas Fields
- 4) No parking along Maple Street adjacent to the GSA Ray Thomas Fields
- 5) Smoking or Consumption of Alcoholic Beverages is prohibited
- 6) Glass bottles are prohibited
- 7) Please place all trash into available trash receptacles
- 8) Parking is permitted at Annie Purl Elementary School, north of the GSA Ray Thomas Fields.

### **Player Drop Off For Practices:**

If bad weather or lightning is in the forecast, we ask that parents DO NOT drop their kids off for practice and leave the facility. Please stay behind in the case of a possible practice delay or field closure due to weather.

### **Bad Weather Policy:**

In the event of bad weather, the fields will remain open unless the soccer fields become unplayable due to a dangerous playing surface or high winds. A dangerous playing surface is based on the amount of rainfall received within a short period of time. This will be determined by 3 pm. In the event that the fields are open and practices have begun, the coaching staff on site will decide if practices need to be delayed or cancelled based on real time conditions.

### **Bad Weather Notification:**

GSA will always attempt to be proactive in cancellations of practice or games due to bad weather. In the case of bad weather cancellations, our members will be notified by email, but you should also check the GSA website for field status updates.

### **GSA Lightning Policy:**

In the event of lightning, GSA operates on 20/30 rule. This means if a lightning strike occurs within 20 miles of the soccer fields, then fields are cleared for a minimum of 30 minutes. This is determined using our handheld lightning monitor.

### **GSA Lightning Procedures:**

In the event of the soccer fields being cleared of teams due to lightning within 20 miles, it is vital that players, parents, coaches and volunteers get into their cars immediately. If the delay is extended to 45 minutes into the practice session, then that practice will be cancelled. For example, if practice begins at 6:00 PM and the last lightning strike occurred at 6:05 PM, then the earliest the players could return to the fields would be 6:50 PM. In this example, practice would be cancelled for the 6:00-7:30PM session. Remember to never stand in parking lots, under trees, under the pavilion, or anywhere near water during a lightning delay. Please get into your vehicles with the windows rolled up.

## **Georgetown Soccer Association** **Field Usage and Safety Guidelines & Policies**

### **GSA Lightning Safety & Designated Weather Watcher**

All individuals participating in or observing an outdoor soccer event at the GSA Ray Thomas Soccer Fields are responsible for their own safety and should monitor threatening weather conditions. Before each practice, warm-up, or game, the club has appointed individuals as the designated “weather watcher.” If the coach is the only club official at the event, then the home coach is responsible for the duties of “weather watcher.” The weather watcher will make the decision to stop play, remove individuals from the field, and announce a warning to the spectators.

The designated weather watcher should be aware of weather conditions at all times, including observing the conditions and keeping abreast of the weather forecast. As a means of monitoring local weather, the designated weather watcher can consult the National Weather Service for current information. All storm warning and storm watches should be heeded. When the weather becomes dangerous, the designated weather watcher will announce that all play activities are suspended and all individuals, both players and spectators, should seek appropriate shelter.

No place is absolutely safe from lightning threat; however, some places are safer than others. Large, enclosed structures (substantially constructed buildings) tend to be safer than smaller structures or open structures. In general, a fully enclosed vehicle with the windows rolled up tends to be safer than being outside so long as contact with metal surfaces inside and outside the vehicle is avoided. The following areas are not appropriate shelter and should be avoided: Any area of higher elevation; wide-open areas such as sports fields, tall isolated objects such as flag poles, light poles, or trees; metal fences and metal bleachers, unprotected open buildings like dugouts, picnic pavilions, rain shelters and bus stops.

When determining whether or not to suspend play, the designated weather watcher should use his/her common sense and good judgment and or the Club provided lightning detector. If a thunderstorm appears imminent before or during an activity or contest (regardless of whether lightning is seen or thunder heard), postpone or suspend the activity until the hazard has passed. Signs of imminent thunderstorm activity are darkening clouds, high winds and thunder or lightning. Even storms that are many miles away can pose a lightning danger. This may mean the appropriate decision is to suspend activities even before the first sight of lightning or sound of thunder.

If the Lighting detector reads lightning within 20 miles of the GSA Ray Thomas complex all games/practice/events will be suspended.

All individuals should have the right to leave an athletic site or activity, without fear of repercussion or penalty, in order to seek a safer structure or location if they feel they are in danger from impending lightning activity. Safety is the number one consideration, the activity can be made up later.

## Georgetown Soccer Association Field Usage and Safety Guidelines & Policies

If activity has been suspended due to lightning, the designated weather watcher should wait at least 30 minutes before resuming activity. Each time additional lightning is detected, the minimum 30-minute waiting period should be reset. A clear sky or lack of rainfall are not adequate indicators for resuming play. The minimum 30-minute return-to-play waiting period should not be shortened. Play should not be resumed even after the 30 minute waiting period if any signs of thunderstorm activity remain in the area or if the weather forecast indicates the threat is not over.

***NO LIGHTNING SAFETY GUIDELINES CAN GUARANTEE ABSOLUTE SAFETY. IT IS THE RESPONSIBILITY OF EVERY PLAYER AND PARENT TO BE AWARE OF WEATHER CONDITIONS AND TAKE APPROPRIATE ACTION TO BE SAFE. USE COMMON SENSE AND GOOD JUDGEMENT. PLAN AHEAD AND MAKE SAFETY YOUR NUMBER ONE PRIORITY.***
