

YOUTH HOCKEY PROGRAMS FALL/WINTER 2018-2019

The ICE WORLD YOUTH HOCKEY PROGRAM has been developed to serve the needs of players from age 4-8. The program is designed for players that have graduated from hockey basics and will reinforce the fundamental and advanced aspects of skating, shooting, passing, and stick handling, within the ADM setting. More advanced players will be challenged with the finer points of these skills. The program will adhere to the long term development model of sports development through its use of skills set groups and teams.

There are 3 options to choose from: U6 Atoms, U8 House and U8 Travel. It will support both half-ice and cross-ice players with skills set and proper ice utilization. The program is designed to work hand in hand with the Harford North Stars Ice Hockey Club's Half-Ice Mite Program.

Coaches in the program will be USA Hockey Qualified and work as a team to best benefit the U8 players at all levels and skills. All coaches in the program are focused on player development within a fun environment. The goal of all coaches is to create better skilled players that love to play the game of ice hockey through small area games, and stations.
