Re: Vaccination Policy for 2022-2023 Season

---

Hockey Northwestern Ontario Board of Directors along with the recommendation from HNO's Chief Medical Officer have made the decision to not extend the COVID-19 Vaccination Policy for the 2022-2023 hockey season. HNO would like to highlight that all programs regardless of level are ultimately required to adhere to all public health, municipal and facility policies and directives, if more restrictive than the current provincial guideline.

HNO will still follow the recommendations and restrictions that may be set forth by the government, public health units, facilities etc.

It is strongly encouraged to consider getting vaccinated.
