

Families and Players:

First, we want to thank everyone for their continued support and cooperation during our reopening process. We will continue to keep the building safely sanitized by following our previously posted cleaning routine, building in gaps between programs and supplying gloves and masks at our front counter.

Starting Friday, June 26th, we will update our mask and face covering policies for the facility to follow the latest directive from the State of Nevada. The updates include:

- All people entering the facility over the age of nine, unless they have a preexisting condition that exempts them from wearing one, will wear a mask or face-covering
- Spectators will wear their mask/face-covering for their entire visit
- We require that all players and officials wear a mask/face-covering while entering and exiting the building and while in the locker room
- We are still asking players and families to arrive no more than 20 minutes before their session and to limit the amount of people coming to watch
- After the session, we ask that players exit the locker room within 20 minutes to allow time for proper cleaning

Again, we thank you -- our hockey community -- for your support.

Yours in hockey,

The City National Ice Arena Staff
