## Fall Skills Check-In Protocol

The Check-In and Tracking Protocol includes each participant (player, coach, etc. or their parent) answering an online survey that will ask for personal and health information for each participant including first name, last name, address, city, phone along with a series of yes/no questions regarding health symptoms. Here is a video outlining the process: <https://www.screencast.com/t/xhN5skqDe>

This information will only be accessible in order to:

- Verify each participant is prepared for each activity by having the check-in/survey completed.
- Provide the details of tracking required to the Minnesota Department of Health should we experience a confirmed COVID case and the information is needed.

For Fall Skills, there will be a check-in/survey link for each Level. The participant should use the link applicable to their activity. For example, if you have a Mite and a 12U player, each player needs to be checked in with their respective Level. The participant can check themselves in, or their parent can.

**Each participant must be checked in prior to getting on the ice.** Once you fill out the form a few times, the fields will begin to auto-populate to decrease the amount of time it takes. It should take less than 30 seconds to check-in a participant.

We appreciate your support as we embark on a season of new practices for all of us. Please help us do our part to follow the established guidelines and protocols so we can keep playing hockey. **Thank you!**
