

Hydroponic Garden Responsibilities Checklist:

Daily Tasks:

1. Are both timers plugged in?
2. Check the farmstand for leaks. (Look for water along seams and floor area.)
3. Is the water pump turning on?

Weekly Tasks:

1. Room temperature should be between 60-95 degrees F
2. Have any glow rings burned out?
3. Check water pH. (Optimal level is 5.5 to 6.0.)
4. Add nutrients A & B. (See package for dosage.)
5. Top off water in bottom reservoir. (Use tap water and clean container.)
6. Observe & assess plant health.
