

SFBA Traveling Basketball Pool Play Tie-Breaker Rules

Two team tie:

In the situation where two teams are tied, head-to-head competition between the teams shall determine the winner.

Three or more teams tied:

Step One:

If more than two teams are tied, a point differential tie breaker will be applied. The point differentials of the teams involved in the tie are totaled. Teams are then ranked according to the sum of the point differential and the team with the highest rank is determined the pool play winner. (Regardless of the actual game scores, 13 points is the maximum plus or minus total that will be factored into the point differential calculation.)

Note: Once the pool winner has been determined via the point differential, the tie between the remaining two teams shall be broken based on the head to head competition.

Step two:

If more than two teams are still tied after the application of step one, the pool play winner will be determined via total points scored.

Step Three:

If more than two teams are still tied after the application of step two, a three way flip of a coin shall break the tie, with the odd team being declared the pool winner. The tie between the two remaining teams shall be broken based on the results of their head to head competition.

Special Note: All forfeits are scored 13-0.
