

SYC SOFTBALL

SYC Sport: Fall softball - 2020

Phase 2 up to 50 total attendees training

Program Activity Plan

- Fall season start and completion dates: Exact dates TBD but plan is to begin in early-September and end in early-November.
- Will attempt to schedule 8 games, similar to a typical fall season.
- Updated game rules TBD but main changes are noted in the on-site field procedures.
- No indoor practices; all activities will be outdoors.

On-site Field Procedures

- Arrival:
 - All participants will be expected to complete screening check-in procedures.
 - Parents will be required to show email proof of screening completion or certify as such in writing on arrival.
 - Participants should bring hand sanitizer and use at beginning of practice or game. SYC will provide sanitizer also.
 - Social distancing required (6' +) for players and participants.
- All participants must practice social distancing, with the exception of limited periods of game play that don't allow for the full 6' of distancing. Coaches and assistants will ensure as much social distancing as possible, including drills that allow for social distancing and team "huddles" that provide the 6' spacing. The goal is 95%+ social distancing and keeping the non-social distance periods to a minimum duration.
- Mask wearing is generally optional for players. Mask wearing is mandatory for coaches and assistants, except where social distancing of 15' or more can be established (certain drills, breaks).
- Participant personal items must be spaced out or held by parents; dugout areas will only be used for entering and leaving the field.
- Dugout area during games will be limited to a 4-person maximum, with 6' social distancing.
- Parents / spectators are permitted, masks optional, but 10'+ social distancing must be maintained.
- No team snacks please.
- There will be at least 10 minutes of buffer time between scheduled end time of a practice and start time of a practice, if another team is using the field. For games, there will be at least 10 minutes of buffer time between the end of one game and when any players from the next game are asked to show up for warm-ups.

SYC SOFTBALL

Equipment; we plan to minimize any shared equipment but it may not be feasible to have no shared equipment. For any shared equipment:

- Helmet face guards to be sanitized after each use
- Balls and bats to be sanitized at the end of each practice or game

Coaches/Activity Volunteers

- Use hand sanitizer issued to coaches to spray participants' hands
- Coaches must wear masks during practices and games, except during break periods where social distancing of 20'+ can be maintained

Field Monitor Volunteers (required)

- Head Coach duties:
 - Responsible to make sure daily check-in occurs
 - Monitor participant distancing
 - Maintain supply of hand sanitizer and Lysol (provided by SYC)
 - Have guidelines in hand and be ready to answer questions
- Field monitor (COVID coach); assign a volunteer for each practice or game to take charge of the daily check ins and monitor social distancing. This person's primary task is monitoring COVID safety and reporting transgressions to the team's head coach and, as needed, to the softball commissioner and to SYC admin.

Communication

Contact the SYC office or the SYC softball commissioner with any questions or concerns about Return to Play procedures

Phase 3 Guidelines

- No change in procedures from Phase 2

SYC General Guidelines: *see SYC General Return to Play Guidelines

Phase 3 up to 250 attendees with training, games, and scrimmages

(distinguish from phase 2)

SYC General Guidelines (pre-populated)

These were written based on state and local mandates)
