RE: Affiliates COV-19 Policy Notices

As discussed during the Fall NDAHA meeting on 12 September 2020, USA Hockey and NDAHA are deferring to local government officials, public health agencies, and facility owner and managers for COV-19 transmission prevention procedures. The unique situations within each community are too diverse for hockey governing bodies to make policies applicable to each community.

In order for the hockey community writ large to have a successful season it will be important to establish a clearinghouse where each communities policy is easily obtained by all available for game partners. This will be especially important to give confidence to our out of state partners (MB, SK, MN, SD, MT) that each of us are prepared and ready to be safe hosts.

NDAHA has committed to hosting the clearinghouse by creating and updating a specific webpage portal on our NDAHA website (www.NDAHA.org) that will link directly to each local affiliates COV-19 policy website.

The local affiliates governing policy should be as specific as required to comply with local or facility owner requirements and include contact information to the person(s) who can respond to questions.

Please submit your COV-19 policy links to NDAHA by emailing the information to NDAHA Webmaster Jerry Zachmeier zzakk2@hotmail.com
