

POSITION STATEMENT ON HYDRATING FLUIDS

Over the past several years the OMHA has been asked by parents, players and minor hockey associations to provide its position on the consumption of fluids towards promoting the best possible hydration of participants of Association activities and events.

As a result, and following consultation with the OMHA Trainer's Technical Committee and various external sources, the OMHA Board passed the following Position Statement:

Before, during and after practices and competitions, it is recommended that only water be administered to participants.

For further information regarding hydration and the impact of water, sports drinks and stimulant drinks, please refer to the Health Canada website at www.hc-sc.gc.ca and the Coaching Association of Canada (CAC) website at www.coach.ca.
