

Willy was diagnosed with an aggressive acute lymphoid leukemia in September 2013. He went into remission soon after with the help of chemotherapy. Recently, Willy was re-diagnosed and is in need of a life-saving stem cell transplant. Because he did not match with his family or any of the 19 million people in the registry, Willy desperately needs new donors to join Be The Match.

Willy is a father to his two amazing twin 8 year old daughters, Justine and Samantha. He enjoys watching them grow up and play softball. Because of Willy's heritage, finding a donor is difficult. It's much more likely to match with someone from your own ethnic background, but Willy's background is underrepresented in the registry. Please join the Be the Match registry to help Willy and patients like him find hope.

Donation is usually through blood and is safe, secure, and confidential!
if you are 18-44 please join today!
