- Prevents sprains/strains
- Decreases anti-inflammatory

ASO Ankle Brace

- Used for Patellar Tendonitis, Jumper's Knee, Chondromalacia, Osgood Schlatter's disease
- Stabilizes and compresses the knee and patellar tendon

Patella Band

IS THIS SHORT KNEE BRACE RIGHT FOR ME?

Specifically designed to provide medial (inner) or lateral (outer) kneecap stabilization and support while exercising and throughout the day.

Short, low-profile design for comfort while moving

Open patella provides flexibility, allowing your knee to bend with ease

Versatile strapping system for adjustable tension control

DESIGNED TO TREAT & PREVENT

- Kneecap subluxation & dislocation
- Patellofemoral pain syndrome
- MCL & LCL injuries
- Meniscus pain
- Patellar tendon injuries
- Patellar tracking disorder

WHY YOU SHOULD USE IT

Padded, C-shaped buttress stabilizes your kneecap for maximum patella control

Back of knee is covered for extra support and protection

Lightweight design makes it ideal for exercise

Available in sizes XS-4XL, fitting both average and plus size men and women

3/16" heat-releasing, sweat-wicking material provides breathability

Knee brace can be flipped to support either the inside or the outside of your knee

Hinged Wrap Around Knee

- Prevents sprains/strains
- Provides moderate stabilization of medial and lateral ligaments
- Provides firm compression and soft tissue support
- Hinges designed to reduce hyperextension of the knee joint
- Padded horseshoe buttress protects

Dual Disc Hinged Knee Brace

Shoulder Stabilizer

- Stabilizes the shoulder joint
- Decrease shoulder pain symptoms
- Improve shoulder joint function
- Improve shoulder protection
- Prevents sprains/strains

EVS Shoulder Brace

Lace-up Wrist Immobilizer Brace

- Used for sprains/strains, tendonitis, Carpal tunnel syndrome, De Quervain's and tenosynovitis
- Stabilizes the wrist joint
- Provides compression and comfort

Medspec ASO Wrist Lacer Splint
